## COVERS

**FRONT COVER** The pusher-pod-boom design concept has been around for nearly as long as airplanes have been made, but few have made it in the aviation marketplace. This one is the Anderson-Greenwood AG-14, restored by Dave Powell, whose dad used to work for the company. Read more about it in Budd Davisson's article starting on page 14. EAA photo by Bonnie Kratz.

**BACK COVER:** Another in our series of British lightplane photographs taken by David Macready, this is Alan Hartfield's Dart Kitten II, a single-place lightplane built to use the 36 hp JAP engine (a licensed two-cylinder Aeronca design). For more on the unique aeroplanes of the United Kingdom, see our continuing series of photo essays beginning on page 10.
